

PLASTRON-20% WP

ACARICIDE
WETTABLE POWDER

VAPCO

Class:
Pyrazolecarboxamide

An acaricide active with contact and ingestion action. Used to control all mite stages from eggs to adults (except winter eggs).

COMPOSITION: Each Kg contains:

TEBUFENPYRAD

20% W/W (A.I)

PROPERTIES:

PLASTRON-20% WP: An acaricide used to control red spider mite in apple and fruit trees, and control two spotted spider mites in strawberries and ornamentals.

PLASTRON-20% WP: Inhibits the development of mite eggs oviposited on the undersides of leaves.

PLASTRON-20% WP: Controls all spider mite stages from eggs to adults (except winter eggs)

USES AND APPLICATION RATE:

CROPS	PESTS	APPLICATION RATE / 20 L WATER	APPLICATION TIME	SAFETY PERIOD (DAYS)
Apple, pear	Red spider mite, rust mite	10 gm	- Application must not be made before 90% petal fall. - Spray volume of 250 to 2000 liters of water/ha. - Maximum dose per year is 500 gm/ha	7
Strawberries	Two spotted spider mite	15 gm	- Apply when first mites appears on and before populations become established. - Good spray coverage of the upper and lower leaf surfaces is essential for best results. - Spray volume of 500 to 1500 liters of water/ ha. - Maximum dose per year is 750 gm/ha	3
Ornamentals (Roses)	Two spotted spider mite	10-20 gm	- Apply when first mites appears on and before populations become established. - The higher rate should be used where the pest is already established. - Small scale testing of any rose variety is recommended at all crop stages before use to establish its tolerance under the conditions of use. - Maximum dose per year is 6000 gm/ha	3

• For more details about first aid & precautions please refer to first aid & precautions index.

CAUTION:

- Used only on the above mentioned crops, and follow the recommended safety period before harvest.
- Small scale testing of any rose variety is recommended at all crop stages before use to establish its tolerance under the conditions of use.

RE-ENTRY PERIOD:

48 hours from last application.

COMPATIBILITY:

The product is compatible with most products, compatibility test is recommended before spraying.

Other trade name: KAHRAMAN-20% WP.
