

FIPRIDOR-20% SC

INSECTICIDE
FOR TERMITE CONTROL
SUSPENSION CONCENTRATE

VAPCO

Class:
Phenylpyrazole

Unique insecticide, with contact and stomach action effective to control termites.

COMPOSITION: Each liter contains:

FIPRONIL

20% W/V (A.I)

PROPERTIES:

FIPRIDOR-20% SC: A unique insecticide effective to control termites.

FIPRIDOR-20% SC: Effective termiticides at low-dose.

FIPRIDOR-20% SC: There is no any side effect on beneficial insects and soil microorganism.

FIPRIDOR-20% SC: Insoluble in water and immobile in soil, so it poses minimal risk of ground water contamination.

USES AND APPLICATION RATE:

Highly effective in controlling termite in pre-building constructions, constructed buildings and infected wood as follow:

SITE	DILUTION RATE	APPLICATION RATES & METHOD OF APPLICATIONS
Pre-building constructions	62.5-75.0 ml / 100 lt. water	Use 5 lt. dilution / 1 m ² for horizontal walls or 5 lt. dilution / 1m vertical walls in a depth of 20-30 cm to construct the residual walls using normal spraying equipment.
Constructed buildings		Vertical and horizontal walls treated with the same dilution either by injection or by using treated constructions with the same application rate.
Infected woods		For treatment or prevention of infection by spraying with the same dilution thoroughly sprayed.

RESIDUAL EFFECT:

Time of 50% loss between 28-192 days depends on the type of the soil.
