

PATRON-6% ULV

INSECT GROWTH REGULATOR (IGR)
FOR LOCUSTS CONTROL
ULTRA LOW VOLUME (ULV)

VAPCO

Class:
Benzoylurea

Non-systemic Insect growth regulator acts by contact and stomach action to control desert locusts at the second and third instar.

COMPOSITION: Each Liter contains:

DIFLUBENZURON

6% W/V (A.I)

PROPERTIES:

PATRON-6% ULV: Is a powerful insect growth regulator to control desert locusts at the second and third instar.

PATRON-6% ULV: Which based on Diflubenzuron as active ingredient which is a chitin synthesis inhibitor that interferes with the formation of insect cuticle and lead to disturbance in molting process of the insect.

PATRON-6% ULV: Non-systemic insect growth regulator with contact and stomach action.

PATRON-6% ULV: Safe to the environment due to its selectivity and rapid degradation in soil and water. Have slight to no effect on natural enemies.

PATRON-6% ULV: Its effect does not appear immediately as its effect on nymphs does not appear until after the next moulting process occurs and it has no effect on adult insects

USES AND APPLICATION RATE:

CROP	PEST	APPLICATION RATE	SAFETY PERIOD (DAYS)	RESIDUAL ACTIVITY (DAYS)
All Crops	Locusts (at the second and third instar)	1 lt. / ha over all blanket and barrier treatment	14	7

Hectare = 10000 m²
