

BETATHRIN-25% SC

PUBLIC HEALTH INSECTICIDE
SUSPENSION CONCENTRATE

VAPCO

Class:
Pyrethroid

A pyrethroidal non-systemic insecticide with contact and stomach action. Acts on the nervous system to control a wide range of public health insects.

COMPOSITION: Each liter contains:

BETA-CYFLUTHRIN

25% W/V (A.I)

PROPERTIES:

BETATHRIN-25% SC: Public health insecticide with contact and stomach action. It also acts on the nervous system.

BETATHRIN-25% SC: Gives rapid knockdown, and has good residual activity.

BETATHRIN-25% SC: Use to control a wide range of public health insect such as:
cockroaches, spiders, ants, fleas, mosquitoes, flies, silverfish, cloth moths, carpet beetles, bed bugs and stored product pests.

USES AND APPLICATION RATE:

SITUATION	APPLICATION RATE / 20 LT. WATER	PEST	CRITICAL COMMENTS
Meatworks (non-production areas), farm buildings, food processing establishments, shops, offices, factories, storerooms, hospitals, schools, barracks, houses, ships, rubbish tips.	40 ml	Cockroaches.	Thoroughly spray hiding places (examples cracks and crevices, behind stoves and sinks, around drains, rubbish bins, etc.). If hiding places are not directly accessible spray barrier strips around them. Repeat treatment as required.
		Spiders	Spray spiders, their webbing and areas where spiders may hide directly. It is recommended that webbing is left in place for a few days after application to optimize efficacy.
		Ants	Spray where the nest locate or the infested area.
		Fleas	Clean or vacuum infested areas and burn all materials collected. Spray all infested areas especially under furniture.
		Mosquitoes	Apply to areas where mosquitoes rest such as walls and awnings, fences and shades area.

• For more details about first aid & precautions please refer to first aid & precautions index.

USES AND APPLICATION RATE:

SITUATION	APPLICATION RATE / 20 LT. WATER	PEST	CRITICAL COMMENTS
Meatworks (non-production areas), farm buildings, food processing establishments, shops, offices, factories, storerooms, hospitals, schools, barracks, houses, ships, rubbish tips.	40 ml	Flies	Spray surfaces where flies are known to rest like on ceilings or around windows. Residual effect for many weeks.
		Silverfish	Spray the infested areas.
		Clothes moths	Spray clothes storage areas
		Carpet beetles	Lightly spray carpets, particularly in areas of little or no movement.
		Bedbugs	Fumigate all infested mattresses and clothing. Wash sheets and clothing before re-use. Spray the walls, cracks and crevices, skirting boards and bed frames
		Stored product pests	Clean and vacuum infested areas and burn all materials collected. Thoroughly spray infested areas taking care to treat all cracks and crevices where pests may hide
Rubbish tips	5 ml	Flies	Spray surface of rubbish. Apply 100 – 150 ml of spray solution / m ²

RE-ENTRY PERIOD:

48 hours from the last treatment

NOTES:

Shake weel before use according to FAO specification.

COMPATIBILITY:

Make compatibility test before application.
