

LAFAR

**RODENTICIDE
WAX BLOCKS**

VAPCO

Class:
**Coumarin
anticoagulant**

An anticoagulant rodenticide which shows exceptional activity against all rodent species, also it can be used in all places where rodents can live.

COMPOSITION: Each kg contains:

BROMADIOLONE

0.005% W/W (A.I)

PROPERTIES:

LAFAR: Is very effective rodenticide, by using small amount of bait.

LAFAR: It attracts rodents that like its taste, so they consume the lethal dose more quickly.

LAFAR: Is effective against all determined rodent species including resistant strains to Warfarin.

USAGE AND DOSAGE:

- Placing the blocks in appropriate place is very important, remember that rodents are intelligent, so selection of suitable place is very important.
- Blocks should be placed beside well-defined runs in and around burrows and holes at rate of 15-50 gm or 200-400 gm / donum.

Donum = 1000m²

GENERAL NOTES:

- Blocks should be placed at locations away from children and domestic animals and it is recommended to use in special boxes due to their toxicity, and they should not be placed in open places inside the house.
- All remaining and uneaten blocks should be handled with rubber or plastic gloves and put in plastic bags and dispose them according to the methods followed.
- Dead and non-dead rodents are to be dusted with an insecticide and collected in transparent bags and burned or buried.
- Avoid mouth contact.
- Always wash hands and exposed skin after application.
- Do not placed baits in open places.
- Baits should be covered, only mice and rats can access to baits.
- Do not place the baits in places easy to reach by children, livestock or pets and others.
