

# MEGAVAP

FERTILIZER  
SOLUBLE POWDER

VAPCO

Class:  
Trace Element

Composed of Mn-EDTA and it's used to control manganese deficiency in the crops in the table of use.

**COMPOSITION:** Each KG. Contains:

**Manganese (Mn EDTA)**

**13% W/W (A.I)**

**PROPERTIES:**

**MEGAVAP:** used to control manganese deficiency in the crops in the table of use.

**MEGAVAP:** it can be used in a preventive program or onset of symptoms.

**USES AND APPLICATION RATE :**

CROPS	APPLICATION RATE	FOLIAR APPLICATION RATE	REMARKS
Fruit trees, Citrus, Olives, Grapes	1-3 kg\ha	100 gm\200 lt water	Apply 3 - 5 times during crop cycle via fertigation
Vegetables, Strawberries, Ornamentals	1-3 kg\ha	100 gm\200 lt water	Apply 3 - 5 times during crop cycle via fertigation
Broadacre crops	1-3 kg\ha	250-750 gm\200 lt water	Do not apply during flowering.

**CAUTION:**

- Use only the recommended application rate
- Do not apply by foliar application to stone fruit.
- Do not apply by foliar application to flowers or fruit of any crop.
- With foliar applications on fruit trees apply only post-harvest but before leaf senescence and do not exceed concentration (100g/100L of water)
- Do not apply with copper fungicides by foliar application on all crops.
- If applying with other chelated products do not exceed a maximum concentration of 100g/100L.

**COMPATIBILITY:**

Compatible with many liquid fertilizers, micronutrients, and pesticides and compatibility test is recommended before application.

- For more details about first aid & precautions please refer to first aid & precautions index.
