

RANNAN-10% WDG

PUBLIC HEALTH INSECTICIDE
WATER DISPERSIBLE GRANULES

VAPCO

Class:
Nitroguanidine⁽¹⁾
Pheromone⁽²⁾

Fly bait for the reduction of housefly (*Musca domestica*) populations contain sex attractant material.

COMPOSITION: Each kg contains:

THIAMETHOXAM	10% W/W (A.I)
Z-9 TRICOSENE	0.05 % W/W (SEX ATTRACTANT)

PROPERTIES:

RANNAN-10% WDG: Is a highly effective public health insecticide used to control housefly (*Musca domestica*), a water dispersible granules form

RANNAN-10% WDG: Easy to use suitable for application by paint-on or spot-spraying by following the recommended application dose in the table of uses.

RANNAN-10% WDG: Effective and special combination contain thiamethoxam as an active ingredient with both contact and stomach modes of action and contain sex attractant that makes houseflies to remain in treated areas and consume a fatal dose of the bait.

USES AND APPLICATION RATE:

TYPE OF APPLICATION	APPLICATION DOSE	
	100 GM	400 GM
PAINT-ON	<ul style="list-style-type: none">• Mix 100 gm from RANNAN-10% WDG in 80 ml water until the mixture becomes paintable.• This mixture is enough for 40 m² ground area or 120 m² wall surface• Treated at least 10 places of about 10-30 cm in places where flies congregate	<ul style="list-style-type: none">• Mix 400 gm from RANNAN-10% WDG in 320 ml water until the mixture becomes paintable.• This mixture is enough for 160 m² ground area or 480 m² wall surface• Treated at least 10 places of about 10-30 cm in places where flies congregate
SPOT-SPRAY	<ul style="list-style-type: none">• Mix 100 gm from RANNAN-10% WDG in 800 ml water for 20 m² ground area or 40 – 60 m² wall surface in or ceiling surface in places where flies congregate	<ul style="list-style-type: none">• Mix 400 gm from RANNAN-10% WDG in 3200 ml water for 80 m² ground area or 160 – 240 m² wall surface in or ceiling surface in places where flies congregate

CAUTION:

- Fill tank with water then add **RANNAN-10% WDG** and agitate each 30 minutes.
- Use directly after mixing.
